PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate specialising in full-stack development with expertise in Java, Python, and AI-driven solutions. Proficient in designing and building applications that combine robust backend architecture with intuitive, user-friendly interfaces. Focused on impactful academic projects, emerging technologies, and continuous learning to drive innovative outcomes.

EXPERIENCE

Technology Consultant Intern - Mphasis (Client: Hewlett Packard Enterprise) Feb 2026 – Present

- Developing and enhancing enterprise web applications by building responsive frontend interfaces and integrating backend services using React, REST APIs, and modern web technologies.
- Participating in the design and implementation of user workflows, interface components, and knowledge discovery experiences with a focus on usability and accessibility.
- Collaborating with cross-functional teams to translate business requirements into functional product features and intuitive user experiences.
- Supporting the development of AI-enabled solutions by integrating intelligent search and content retrieval capabilities into enterprise platforms.
- Engaging in Agile development practices including requirement analysis, feature development, testing, documentation, and continuous improvement activities.

TECHNICAL SKILLS

- **Programming & Scripting:** Java, Python, JavaScript, C
- **Web Technologies & Frameworks:** HTML5, CSS3, React, Node.js, Express.js, Flask
- **Databases:** MySQL, MongoDB, SQLite
- **Concepts Tools:** Git/Github, Figma, REST API
- **AI & Machine Learning:** Machine Learning, NLP, Hugging Face, OCR
- **Soft Skills:** Critical Thinking, Troubleshooting, Team Collaboration, Analytical Thinking, Communication

PROJECTS

TradeNexus AI – AI-Powered Financial Analysis Platform *Next.js, TypeScript, Flask, PostgreSQL, NLP*

- Developed a full-stack AI-powered financial intelligence platform featuring secure JWT-based authentication, stock analysis, portfolio management, investment strategy generation, market trend tracking, and an AI financial assistant within a unified dashboard.
- Engineered a stock evaluation and recommendation system by combining market data, financial news insights, and NLP-driven sentiment analysis, enabling users to make data-backed investment decisions with greater confidence.
- Built automated market intelligence pipelines using BeautifulSoup-based data extraction and real-time analytics dashboards, reducing manual stock research and analysis effort by approximately **70%**

OCR and Multilingual Translator Web Application *Python, Flask, EasyOCR, Google Translate API, SQLite3*

- Developed a Flask-based OCR system integrating EasyOCR, PyTesseract, and OpenCV for multilingual text extraction from images, including support for handwritten text recognition and image preprocessing.
- Automated language identification and translation pipelines using LangDetect and Google Translate API, enabling seamless conversion of extracted content across multiple languages.
- Implemented database-driven record management with SQLite3 for storing image binaries, OCR outputs, translations, and timestamps, improving traceability and retrieval of processed documents.

Diabetes Prediction and Analysis Tool

Python, Flask, Scikit-learn

- Developed a machine learning-based web application to predict diabetes with **85%** accuracy.
- Integrated secure user authentication and deployed the application on Render.

EDUCATION

B.E. in Computer Science , Maharaja Institute of Technology Mysore CGPA: 9.00 / 10.0	2022 – 2026
Pre-University , Marimallappa PU College, Mysuru PCMB - Percentage: 87.00%	2020 – 2022
SSLC , Sadvidya High School, Mysuru Percentage: 88.9%	2016 – 2020

ACHIEVEMENTS

- **Apna College Sigma 6.0 (Ongoing):** Training in Full-Stack Web Development (MERN Stack), Data Structures & Algorithms in Java and Quantitative Aptitude.
- **AI & Data Science Applications (TejasPro Trainings - Industry Skilling Program):** Completed hands-on training in AI, data science, machine learning, and data analysis through practical labs and project-based learning.
- **National Level Hackathon 5.0 (Cyber Security & Ethical Hacking – INVADERS):** Designed innovative cybersecurity solutions among 50+ teams at MIT Mysore (Nov 2023).
